SUMMARY

Computer Science student at Bina Nusantara University with hands-on experience across DevOps, cybersecurity (SecOps/SIEM), and AI-driven security engineering, gained through an internship building CI/CD pipelines, container orchestration, and Generative AI-powered threat analysis systems. Also developing practical Deep Learning skills using PyTorch, CI/CD pipelines, and containerization (Docker) to deploy and scale models on GCP and AWS.

EDUCATION

Bina Nusantara University 2023 - Present
Bachelor of Engineering - GPA 3.42, Major in Computer Science

EXPERIENCE

PT Malifax

IT Developer Intern April 2026 - September 2026

- Automated the release process for 8 applications, delivering 10+ gated production releases, by building 8 CI/CD pipelines in Jenkins with Git-tag triggers and RBAC/LDAP-integrated approval gates.
- Enabled sub-1-minute rollback recovery for every Docker Swarm application by integrating Jenkins with the Portainer API and Harbor Registry for automated builds, deployments, and rollbacks.
- Secured and load-balanced traffic across the entire Docker Swarm cluster by configuring Nginx as a reverse proxy with SSL/TLS termination.
- Automated triage of 100+ security logs weekly by integrating the Gemini API into Coreview's AI-driven SOC-Triage module for log correlation, MITRE ATT&CK extraction, and IOC detection.
- Protected sensitive data in AI-assisted workflows by building a backend data-masking layer, rate-limiting middleware, and a PostgreSQL usage-audit system, letting analysts prompt freely with no data leaving the company.
- Built real-time SIEM monitoring on Wazuh (500-1,000+ enrolled devices, later commercialized and sold to multiple companies), auto-routing 1,000+ security alerts to Telegram via custom decoders and detection rules.
- Reduced security risk across 6 production systems by remediating 239/258 vulnerabilities (93%, including 100% of Critical and 91% of High-severity findings) per the ISO/IEC 27001:2022 Risk Treatment Plan.
- Architected the Malifax website's data model on Strapi Headless CMS: 20 content types, ~88 REST endpoints, and 31 reusable components consumed via dynamic zones.

Bina Nusantara Computer Club (BNCC)

Learning and Training Staff February 2025 – January 2026

- Appointed as vice project manager for LnT Camp 2025, co-managed the end-to-end execution of LnT Camp 2025 overseeing internal committee operations across the publication division.
- Appointed as the on-the-day committee for LnT Insight, acted as the technical liaison for the speaker, managing presentation slides and audiovisual equipment to guarantee a professional and seamless session to 50+ participants.
- Appointed as a mentor in BNCC Leadership Development Program (LDP) 2025, providing guidance on technical expertise and organizational leadership to a team of 7 activists.
- Appointed as the main person in charge of LnT Class Front-end Development, coordinating end-to-end class operations with an average of 30+ participants per session.

Learning and Training Activist January 2024 - February 2025

- Appointed as the on-the-day committee for LnT Camp 2024 and Trial Class 2024, acted as the technical liaison for the speaker, managing presentation slides and audiovisual equipment to guarantee a professional and seamless session to 100+ participants.

Learning and Training Course - Front-end Development Member September 2023 - October 2024

- Applied advanced front-end concepts in building a responsive personal portfolio website using React.js and Tailwind CSS.

SKILLS

Programming: Python, C, C++, Java, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: PyTorch, Scikit-learn, Next.js, Strapi Headless CMS, Pandas, React, Numpy

DevOps & Infrastructure: Jenkins, Docker, Docker Swarm, Portainer, Harbor Registry, Nginx (Reverse Proxy), Linux (Ubuntu/Debian), Bash Scripting, CI/CD Pipeline Automation, LDAP Integration, GCP, GitHub Actions

Cybersecurity & SecOps: Wazuh SIEM (Wazuh Indexer & Dashboard), SOC-Triage, Threat Scoring, Log Parsing (Regex), Data Masking, Rate Limiting

Database & APIs: PostgreSQL, RESTful APIs, JSON Fingerprinting

Soft Skills: Team management, problem solving, communication, analytical thinking
